

How much does Lesotho government contribute to solar power project?

Lesotho Government Contribution to this project is estimated at M220 million which will cover the costs of land compensations valued around M57 million, Tax obligations as well as operating costs of Lesotho Electricity Generation Company (LEGCO). The government is implementing 70MW solar electricity generation project at Ramarothole in Mafeteng.

What does the Department of energy do in Lesotho?

The Department of Energy is committed to increasing energy access and ensuring security of energy supply in the country. The Department of Energy is tasked with promotion and implementation of renewable energy projects and programs. A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS).

Who financed 30MW solar project in Lesotho?

A Chinese based contractor SINOMA-TBEA Consortium has been engaged to construct the 30MW solar project. The project is under the direct supervision of Lesotho Electricity Generation Company (LEGCO). Phase I (30MW) of the project is financed by a soft loan from EXIM Bank of China with total contribution of USD 70.188 million.

Who is OnePower Lesotho 1PWR?

Khotso! Welcome to OnePower Lesotho 1PWR is a fast-growing startup based in Lesotho whose mission is to provide affordable and reliable electricity services to off-grid villages, giving families, schools, health clinics, and local businesses the resources needed to grow and thrive.

Does Lesotho have electricity?

Known as the kingdom in the sky, Lesotho is a small, developing country crossed by mountain ranges and rivers, making it difficult to get electricity to rural regions. Recent estimates suggest that less than half of all households have electricity.

What is Ramarothole solar power project in Lesotho?

The project will be under the direct supervision of Lesotho Electricity Generation Company (LEGCO). The 70MW Ramarothole solar power project is planned to be implemented and built in two phases: Phase I: 30MWp with construction period of 18 months and Phase II: 40MWp to be completed in 2030.

Today, anyone can set up a solar power plant with a capacity of 1KW to 1MW on their land or rooftops. Ministry of New and Renewable Energy (MNRE) and state nodal agencies are also providing 20%-70% subsidy on solar for residential, institutional, and non-profit organizations to promote such green energy sources. State electricity boards and distribution companies will ...
