

"We're committed to building what matters, using our budget to drive jobs and growth to recover from COVID-19," van Holst Pellekaan said. "The Marshall Government has used its significant purchasing power to secure the ...

The 54MW portfolio consists of two battery storage projects with a combined capacity of 25MW along with 29MW of solar PV, all of which are expected to enter commercial operation in 2022. This year has also seen RES ...

AES will develop a 100MW battery for the utility Arizona Public Service. The installation will be used to provide "critical peaking capacity" and "increased" grid reliability. AES will provide a system with a four-hour duration based on Fluence's Advancion platform. It will be leased under a 20-year contract with AES the owner and ...

A battery energy storage system (BESS) being developed by Aura Power at Drax in Yorkshire has been granted planning permission. The 100MW BESS was approved by Selby District Council last week, with Aura Power planning manager George Wilyman telling councillors that the development will "directly support the effective transition to a renewable ...

A partnership between a local developer and South Korea's Hanwha Group could bring two 100MW battery energy storage projects to the Midlands of Ireland, the developer, Lumclon Energy, has confirmed. ... "These battery storage systems represent a great opportunity to reach our emission reduction targets. It will also result in significant ...

Zenobe Energy has unveiled a 100MW project in Capenhurst, Chester, which it said is set to be Europe's largest grid-connected battery. The project will be the first in the world to win a long-term contract from the country's transmission system operator to directly absorb reactive power from the transmission network, the company has said, and is expected to begin ...

Two UK battery energy storage systems (BESS) under development by Japanese engineering firm Nippon Koei's Netherlands-based subsidiary have reached financial close. The two 49.5MW BESS are located in Tollgate and Cuxton, near London, with Nippon Koei Energy Europe B.V (NKEE) leading the planning and development, delivery of the EPC and ...

Update 28 January 2021: An AES Corporation representative told Energy-Storage.news that the new natural gas plant at the Alamitos site went online in early 2020 and offered a bit more clarity on the applications and benefits of the battery project, as well as sharing some photographs of the project, which we've also added: "The BESS is sited at the Alamitos ...

The Marshall Islands' World Bank-funded renewable energy project is the first step toward energy security and sustainability. The Implementation of The Marshall Islands' renewable energy ...

This 50MW/100MW grid-side energy storage power station, located in Jiande, Zhejiang province, serves for peak and frequency regulation. After completion, it can effectively promote the local ...

Penso Power is developing a 100MW battery storage site in Wiltshire, announcing today (19 March) it is to expand the project by another 50MW, further increasing what is billed as the biggest storage project in Europe. ... The initial 100MW saw investment from China Huaneng Group and Chinese government-backed fund CNIC, with G2 Energy appointed ...

The initial 100MW saw investment from China Huaneng Group and Chinese government-backed fund CNIC, with G2 Energy appointed principle designer and principle contractor. Sungrow is the integrator providing the ...

AES will develop a 100MW battery for the utility Arizona Public Service. The installation will be used to provide "critical peaking capacity" and "increased" grid reliability. AES will provide a system with a four-hour duration ...

With the combination of having a "generation 2" battery and updated electronics, this vehicle has performed outstandingly in its test--frequently running a three shift day with very stable battery ...

The Renault-Nissan Alliance will build a 100MW battery storage project using its second-life EV batteries, according to media reports. The car manufacturer confirmed to Reuters that it is working with German firm The Mobility House on a feasibility study for what a spokeswoman called a "major energy storage project".

A 100MW battery storage facility in Co. Offaly in Ireland has this week been energised, having been developed as part of a partnership between local developer Lumcloon Energy and South Korea's Hanwha Group. Writing on social media site LinkedIn, Irish network operator ESB Networks said it had enabled the connection and energisation of the ...
