

Will Estonia be fully solar powered by 2030?

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it now aims to be fully green-powered by 2030.

Is Estonia a good country for solar power?

Meanwhile, the Estonian solar industry is also on the rise. Estonia is becoming a leader in per capita solar power production and has set the ambitious goal of being fully green-powered by 2030. Estonia ranks 6th among EU members in solar power per capita, with 596 watt per capita in 2022, up from 405 in 2021.

How much solar power does Estonia have in 2022?

That makes another record-breaking year for solar on the continent, with a total of 10 GW more capacity added than expected. Regarding solar power per capita, Estonia has emerged as one of the new leaders. The country is ranked 6th among 27 EU members, with 596 Watt per capita in 2022, jumping from 405 in 2021.

Where is Solarstone based?

Solarstone's factory in Viljandi is located on an area of 1,200 sqm, where anyone can pay a visit (with prior notice) and get acquainted with the product range. „With today's setup, we can produce 20,000 tile interlocking solar modules per year, resulting in approximately 715 design solar roofs and 25,000 Click-on kits.

How many solar roofs does Solarstone install in 2022?

The company was founded in 2015 and has installed over 700 solar roofs in eight countries. In July 2022, Solarstone raised EUR10 million to fund European expansion. According to the report, the EU's total solar power capacity grew by 25%, from 167.5 GW in 2021 to 208.9 GW in 2022.

Why did Solarstone start in Viljandi?

„All three Solarstone founders were either living in Viljandi or had a very close relation to this town, hence the decision was born to also kickstart the business in here and build lasting roofing systems that look pleasant to the naked eye," Silver Aednik, company's managing director and co-founder says.

The European Commission has approved a EUR2.6 billion government scheme to support the development of offshore wind in Estonia. by Robyn White European Commission approves Estonia's EUR2.6 billion offshore wind scheme - Alternative Energy Resource Video

Just like the planets orbit the sun and the moons orbit the planets, our new Alternative Solar System print maps out the massive pull and influence that bands like the Beatles, the Velvet Underground, Ramones, Hüsker Dü, The Clash and Nirvana have had on each other and the bands around them. At the centre of our Alternative Solar System shining brightly are the ...

If you own an apartment, you may be able to benefit from a balcony solar system. These combine smaller PV panels with balcony fixings and, typically, a micro-inverter which converts their output into usable electricity. Like a full solar install, a balcony system can often be enhanced with battery storage.
