

Why do Armenians use solar energy?

The reason for this is that average solar radiation in Armenia is almost 1700 kWh/m² annually. One of the well-known utilization examples is the American University of Armenia (AUA) which uses it not only for electricity generation, but also for water heating. The Government of Armenia is promoting utilization of solar energy.

Is Solara a green energy company in Armenia?

THIS IS NOW! Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Why Choose Solara? There is a great potential for solar energy in Armenia.

Does Armenia need a solar power plant?

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels located in Gladzor. Solar power potential in Armenia is 8 GW according to the Eurasian Development Bank.

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

Are solar panels legal in Armenia?

Consumers are allowed to install solar panels with total power of up to 150 kW, and may sell any surplus to electricity distribution company Electric Networks of Armenia (ENA). In Armenia, solar thermal collectors, or water-heaters, are produced in standard sizes (1.38-4.12 square meters).

How much solar energy does Armenia produce a year?

According to the Ministry of Energy Infrastructures and Natural Resources of Armenia, Armenia has an average of about 1720 kilowatt hour (kWh) solar energy flow per square meter of horizontal surface annually and has a potential of 1000 MW power production.

Termosistemas Energéticos; a Solar, Aire Acondicionado y Redes de gas. Desarrollamos proyectos enfocados a la gestión energética, integrando e implementando sistemas de energía solar y sistemas de aire acondicionado (HVAC) para disminuir la huella de carbono y un porcentaje de los costos energéticos.

Cuando visite Echmiadzin no pierda la oportunidad de hacer una parada en el magnífico Templo
Zvartnots construido en el siglo VII. Localizado a 5km de Echmiadzin, este hito es una de la atracciones de la
arquitectura medieval armenia más brillantes. Desafortunadamente, el templo ha sobrevivido solo en
ruinas, tras ser completamente destruido por un poderoso terremoto en ...

? In the Doping podcast, we emphasize the need to rebrand the term "#Hayavari," which translates
to "in an #Armenian style" & unfortunately doesn't often carry a positive connotation. In our
latest episode, we spoke about #Telemarket, a successful project that was in 21 countries, which many were
surprised to learn is Armenian.
