

What is Battolyser®?

Battolyser® is a 100% flexible electrolyser with integrated battery capacity. It can follow highly volatile renewable energies and switch instantly and safely between hydrogen production and electricity discharge, leading to the lowest LCOH.

Where are Battolyser systems located?

Battolyser Systems is located in Schiedam, Zuid-Holland, The Netherlands. Who invested in Battolyser Systems? Battolyser Systems is funded by European Investment Bank. How much funding has Battolyser Systems raised to date?

What is Battolyser® 5MW?

The Battolyser® 5MW is a 5MW/MWh system, skid mounted and can be delivered with a fully equipped Balance of System. Delivery Q2 2025 Battolyser® 25MW is our large-scale system. It is designed for installations ranging from 10 to 500 MW, generating green hydrogen at scale and at the lowest possible Levelised Cost of Hydrogen.

What is Battolyser® 25MW?

Battolyser® 25MW is our large-scale system. Designed for generating green hydrogen at scale and at the lowest possible Levelised Cost of Hydrogen. Want to learn more? GREEN HYDROGEN...

What can Battolyser systems do for You?

Typically, Battolyser Systems can deliver solutions that add value in on and off-grid applications as well as in flexible and base load hydrogen offtake applications. Battolyser Systems has taken a groundbreaking step by developing the world's first integrated battery electrolyser system, known as the Battolyser®.

When did Battolyser systems close?

Battolyser Systems closed its last funding round on Oct 11, 2023 from a Debt Financing round. Who are Battolyser Systems's competitors? Alternatives and possible competitors to Battolyser Systems may include Electric Hydrogen, Natron Energy, and Svea Solar.

Le système Battolyser, créé aux Pays-Bas, constitue une véritable innovation qui permet d'associer batteries et production d'hydrogène propre, le tout avec d...

Battolyser B.v. has not been involved in any patent assignment transactions in the PlainSite database. Filter By: From To Date Recorded: Client / Assignee: Document No. Mark: 3/21/2019: Battolyser B.v. 5736080: 3/21/2019: Battolyser B.v. 79230523: 2 Rows Total: No reviews have been posted about this attorney yet. This technology has formed the basis for the creation of a Spin-off company, Battolyser bv. Their next step is the realisation of a scaled-up facility in the Eemshaven which should be operational by half 2019, and subsequent further scale-ups.

Het Waddenfonds heeft aan Battolyser B.V., een joint venture van TU Delft en Proton Ventures, 480.000 euro subsidie toegekend om een battolyser te realiseren naast de Magnum-centrale van Nuon in Eemshaven. Nuon en Yara dragen bij aan het ontwikkeltraject.

Battolyser Systems General Information Description. Developer of an integrated battery and electrolyzer designed to store electricity. The company's technology is a dual-purpose energy storage solution with a combined battery and electrolyzer function that can store electricity and produce hydrogen from renewable power to balance societal demand, enabling customers to ...

Battolyser Systems confidential material, do not share without explicit consent Battolyser's, a 100% flexible pressurised alkaline electrolyser ... Germany and France allocate 75% of all State Aid in Europe. 5 Battolyser Systems confidential material, do not share without explicit consent Unlocking 100% green hydrogen.

Welcome to Battolyser Systems, a fast-growing cleantech scale-up company based in The Netherlands. Battolyser Systems is an innovative electrolyser producer enabling 100% green hydrogen at lowest LCOH. The Battolyser's is the world's first electrolyser that can instantly switch on and off following intermittent renewable energy production.

At the turn of the 20th Century, Thomas Edison patented a nickel-iron battery which had an undesirable quirk of producing hydrogen. A century later Prof. Dr. Fokko Mulder and his research group at Delft University of Technology saw the combined use of battery and electrolyser as an advantage for the new age of renewable power, and invented a super-efficient integrated ...

Battolyser, de spin-off van de Technische Universiteit Delft (TU Delft), bereidt zich voor op de installatie van een grootschalig energieopslagsysteem van batterijen dat ook waterstof gaat produceren. Deze gepatenteerde technologie daagt hierbij de conventionele alkalische elektrolyzers voor de productie van waterstof en ammoniak uit om de ...

Battolyser Systems develops and manufactures the first integrated battery and electrolyser that can store electricity and produce hydrogen from renewable power to balance societal demand. A Battolyser can store and supply electricity and when fully charged it splits water into hydrogen and oxygen. It can produce hydrogen when electricity prices ...

De besloten vennootschap Battolyser B.V. is gevestigd op Karel Doormanweg 5 te Schiedam en is actief in de branche Technisch speur- en ontwikkelingswerk. Het bedrijf is bij de kamer van koophandel geregistreerd onder kvk nummer 70827540 en is gelegen in Havenbuurt in de gemeente Schiedam. Bij Battolyser B.V. zijn

tussen de 2 en 5 personen werkzaam.

The Battolyser Technology: From Concept to Reality . The Battolyser Technology was founded at Delft University of Technology around 2013 - 2014, by Professor Dr. Fokko Mulder, who still is a professor at the Advanced Material Science Department of Delft's University of Technology, and studies energy storage and conversion technologies.. At that time, he was trying to improve a ...

Battolyser Systems signs EUR40 million financing agreement with European Investment Bank, aimed commercialising and scaling up production capacity of its Battolyser's product range. The financing will enable the company to scale its production facility in Rotterdam towards mass production of its combined electricity storage and electrolyser ...

Nuon en Yara dragen bij aan het ontwikkeltraject. De battolyser kan op een efficiënte manier elektriciteit opslaan of leveren als een batterij, en water splitsen in waterstof en zuurstof door elektrolyse wanneer de batterij vol is. De realisatie van een eerste battolyser in Eemshaven begin 2019 is een belangrijke mijlpaal voor Nuon in Groningen.

Battolyser Systems develops and builds a new electrolyser design that can also function as a battery - a "Battolyser". These systems can fully follow intermittent power supply at high efficiency and throughput. It is made from abundant ...

Battolyser Systems, the manufacturer of the world's only electrolyser with battery functionality that enables the lowest cost green hydrogen, has raised EUR30 million in Series A ...
