

Battery backup unit which can be used by connecting to Murata's centralized power supply system. In the event of power outage, it will power IT equipment a certain time instead of PSU. It is used by installing into the Murata's battery shelf.

Battery Backup Unit (BBU) -- Submittal/Technical Data For Series 70 Actuators -- 800-5,000 lb-in. Battery Backup Unit - Specifications Technical Specifications Power Requirements 24-27 VAC or 30-38 VDC (the minimum voltage is required to provide proper battery charging). Use dedicated Class 2 non-bonded transformer rated 100VA per BBU

This is Part 2 of a five-part series highlighting Analog Devices' reference design for the battery backup unit (BBU). The first part, "Smart Battery Backup for Uninterrupted Energy Part 1: Electrical and Mechanical Design", discusses the BBU's electrical and mechanical design considerations. Part 2 goes into further detail about the ...
