

What is energy in Belgium?

Energy in Belgium describes energy and electricity production, consumption and import in Belgium. It is governed by the energy policy of Belgium, which is divided between several levels of government.

Who is the largest electricity supplier in Belgium?

Published by Statista Research Department, Nov 29, 2024 With over 70 percent of the market share in 2024, Engie Electrabel - the Belgian daughter of French multinational Engie - was the leading electricity supplier in Belgium's Brussels-Capital Region. TotalEnergies was the second-largest supplier, holding a market share of 15.7 percent.

Who produces electricity in Belgium?

Electrabel is the main producer of electricity, followed by EDF Luminus. Short term trading is done via the Belpex energy exchange, which is now part of APX-ENDEX. The Belgian transmission grid, operated by Elia System Operator, has a central position in the Synchronous grid of Continental Europe.

How does energy price work in Belgium?

Each month, the prices and promotions of all the suppliers in Belgium are updated on the Energyprice.be website. An initial update is done on the first working day of every month based on the pricing options that are publicly available on that date. Prices are then added as the suppliers publish them.

Who is the second-largest electricity supplier in Belgium?

TotalEnergies was the second-largest supplier, holding a market share of 15.7 percent. Belgium is a country where regions and language communities have strong identities. As such, the market for electricity suppliers is different from one region to another.

Which region in Belgium has the most energy providers?

Flanders is the region in Belgium where the highest number of energy providers are active. Moreover, many providers have decided to only offer electricity and/or natural gas in this region, such as Aspiravi Energy and Ebem. In total there are 18 providers active in Flanders.
