

Where is refu made?

At its location in Pfullingen at the foot of the Swabian Alb, the company develops, sells and services innovative components for the solar and battery storage market at the highest technical level. Production takes place in Pfullingen and at the REFU factory in Hungary.

What does refu do?

REFU develops and integrates synergistic components for stationary energy solutions and thus offers a common platform for the 'energy system revolution'. We bundle our competencies in the areas of high-performance electronics in order to develop economical, efficient and environmentally conscious solutions.

Can refu be used with existing PV systems?

The AC-coupled REFUstor can be easily integrated with existing PV systems. The highly modular solution allows it to be used in systems from 50 kW up to MWs in size to meet the demands of both energy and power applications. The REFUcontrol BC-10 EMS is our solution, completing our REFU inverter that you can build your own Battery System.

Where are refu inverters made?

Production takes place in Pfullingen and at the REFU factory in Hungary. Here, the company can draw on the extensive experience of the team, which has sold over 400,000 inverters to date. REFU Elektronik GmbH is part of the internationally operating PRETTTL group of companies.

What makes refu a successful company?

The key to our success lies in our ability to combine the expertise in controllable power electronics with customer-specific designs and production. REFU is a part of the multinational, diversified PRETTTL Group.
