Welcome to the Centrica Energy page. Stay updated with the latest news, developments, and insights from Centrica's energy marketing and trading division.

Why did Centrica sell direct energy?

In July 2020, Centrica announced the sale of its subsidiary of Direct Energy in North America for \$3.63 billion to NRG Energy, in order to put more focus into its home markets. The money from the sale is to be put to the reduction of net debt and to the contribution of pension plans.

Why did Centrica buy British Energy?

In May 2009, Centrica purchased a 20% stake in nuclear power generator British Energy from EDF Energy. The company now produces 14.3% of its electricity from nuclear plants (the second highest rate in the United Kingdom), helping it to achieve the lowest carbon emissions of the major providers.

How can Centrica achieve net zero?

Getting to Net Zero requires us to build a secure and sustainable energy system. Centrica is active at every step of the energy value chain. Here are just some of the projects where we're energising a greener, fairer future: 1. Leinster Solar Farms 2. Glen Dimplex Smart storage heater trial 3. Dyce battery Storage 4. Net Zero Consultancy at Biomar

Why did Centrica acquire Neas Energy a/s?

In April 2016, Centrica acquired Neas Energy A/S (Neas), one of Europe's providers of energy management and revenue optimisation services for decentralised third-party owned assets.

Power generation is underway at Codford Solar Farm, the first newly built solar farm owned and operated by Centrica, under the company's plans to build out a portfolio of flexible energy assets. Construction began at the site in Wiltshire in April 2022, after the consent was acquired by Centrica Business Solutions in 2021.
