

Who is building a Bess project in Chile?

Independent power producer (IPP) Innergex recently commissioned its second such large-scale project in Chile while utility and IPP Engie is building the third and fourth of its PV co-located BESS projects and will soon start building its first standalone one.

Is Chile a ripe market for Bess investment opportunities?

The Chilean renewable energy landscape and recent regulatory reforms promoting the development of energy storage systems have made Chile a ripe market for BESS investment opportunities.

How many Bess installations are there in Chile?

It brings the total BESS installations in Chile for CJR, an engineering, procurement and construction (EPC) firm, to 523MW, it said in its LinkedIn announcement last week (30 May). Note that the BESS will be an independent project from Sol del Desierto with its own power purchase agreement (PPA), separate to solar PV plants.

What is Bess & how does it work in Chile?

Both standalone and PV-connected BESS projects are being deployed at scale in Chile as it increases its renewable generation and phases out coal and legacy plants. BESS are being added to existing solar PV plants to increase their profitability with substantial, prolonged periods of negative pricing being seen.

Will Chile have a Bess pipeline?

Earlier this year, the Chilean Congress also began discussions to amend its energy transition bill to hold large-scale BESS auctions. The foregoing conditions and governmental actions have resulted in a potential BESS pipeline in Chile of over 6GWs. 1

Why is Bess being added to solar PV projects in Chile?

BESS are being added to solar PV projects in Chile in order to reduce curtailment and negative prices due to over-production, while standalone projects are being built to capitalise on energy market volatility.

They are the first utility-scale standalone projects to get to that stage, co-founder Eduardo Tabbush told Energy-Storage.news, with other projects of that size being co-located with solar PV projects at a single interconnection. Flexen is aiming to get the projects to ready-to-build (RTB) stage in the first quarter of 2025 with a commercial operation date (COD) for 2026.
