

How can we participate in the electricity market in Cyprus?

These projects,when operational,will allow us to participate immediately in the electricity market in Cyprus,by selling the electricity produced as an independent supplier,through a subsidiary company fully licensed by the Cyprus Energy Regulatory Authority to sell electricity to retail customers.

Is Cyprus ready for full electricity market liberalisation?

Currently,Cyprus is in a transitional step before full electricity market liberalisation,which is being driven by the binding timetable of the Cyprus Energy Regulatory Authority (CERA) to ensure the full opening up of the energy market and granting consumers the right to choose their own supplier.

Are solar energy projects a thriving segment for Cyprus?

Over the last several years,solar energy projects have become a thriving segment for Cyprus. The European Bank for Reconstruction and Development (EBRD) alone has financed five solar parks across the island with an investment of EUR10.85 million to increase photovoltaic capacity in Cyprus by 12%.

What is the largest wind farm in Cyprus?

Our Group's portfolio includes the construction and operation of the first, and until today biggest, wind farm in Cyprus, of a capacity of 82 MW.

What is Cyprus' energy policy?

Cyprus' energy policy has created financial support for RES projects,and a special fund was created aiming to support RES and energy saving investments in Cyprus,with revenue derived from consumers paying a 'green tax' levied on electricity bills (currently at EUR0.005 per kWh and EUR0.0025 per kWh for vulnerable groups).

How can Cyprus overcome a high dependency on fossil fuels?

A key hurdle for Cyprus to overcome is its high dependency on fossil fuels for energy - with one of the biggest shares within the EU. This makes it crucial for the country to develop both its renewable energy sources and natural gas,the cleanest of the fossil fuels,as a transitional fuel.
