Czechia is the fourth-largest net exporter of electricity in the EU, right behind France, Germany, and Sweden. It exports most of this electricity to Austria, Slovakia, and Germany. In Czechia, electricity is produced using coal (50%), nuclear power (35%) and natural gas (5%). Although fossil fuels are still forced play a major role in the ...

Czechia approved a new National Energy Policy (SEP) aiming to reduce energy consumption and improve the economy's energy intensity. However, reaching the targets of the SEP will require greater effort if the country is to play its part in the global energy

The Department of State hosted a high-level delegation from Czechia for a U.S. Civil Nuclear Study Tour to promote cooperation on small modular reactor (SMR) and advanced nuclear technologies from December 1-11, 2024. The delegation visited Washington, D.C., Texas A& M University in College Station, Texas, and the Deep Isolation Borehole Demonstration ...

Tato stránka obsahuje aktuální výpis dajů firmy Energylink s.r.o. a dále byly staženy 21. března 2024 z datové služby justice dle IČO 05868513 a dále ve výpise nebyly dle systému ARES ...

Czechia has decoupled economic growth from energy consumption since 2009, yet the country's energy and carbon intensity remain above the IEA average, which highlights the need to make energy efficiency the "first principle" of energy policy. Fossil fuels are still essential building blocks of the energy mix with coal as the single largest ...
