

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group  
Czechia recorded a significant increase in installed solar capacity last year, with about 970 MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

How many solar power plants did Czechia build in 2023?

Czechia built around 1 GW of new PV plants in 2023, according to data from the Czech Solar Association (Sol&#225;rn&#237; Asociace). In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022.

Does Czechia have a solar boom?

Finally, Czechia is also experiencing a second solar boom, with the total added PV capacity in 2023 surpassing 1 GW, marking Czechia's return to the GW-market stage after 13 years. The country, having experienced a solar boom in the past, was one of the first significant PV markets in Europe.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

How long will PV power plants last in the Czech Republic?

"In the years 2009-2010, the expected lifetime of PV power plants in the Czech Republic was 20-25 years. Today, after about 12 years, it turns out that this estimate was too optimistic and the real lifetime is about half."
