

What is a datasafe battery?

The EnerSys 12HX330 Datasafe Battery is a valve-regulated lead-acid battery designed to offer superior solutions for the Information Technology and Uninterruptible Power Supply markets. DataSafe HX batteries are the ideal source of power to protect vital systems.

What is a datasafe HX 12V battery?

EnerSys UPS Batteries, DataSafe HX 12V, are valve regulated lead acid batteries that have been designed to offer superior solutions for the UPS, IT and Telecom (select models) markets which demand the highest levels of security and reliability. DataSafe HX top terminal batteries are the ideal source of power to protect vital systems.

How long does a datasafe battery last?

The addition of an EnerSys Front Terminal DataSafe cabinet allows for higher energy density, and the UL 1778 standard-meeting flame-resistant case and cover ensure that the battery reaches its full 10-year lifespan. DataSafe HX batteries are supplied in a charged condition and are capable of extremely high short circuit currents.

What is a datasafe HX top terminal battery?

DataSafe HX top terminal batteries are the ideal source of power to protect vital systems. DataSafe HX top terminal batteries incorporate select design features that maximize reliability while ensuring superior performance and an excellent service life.

How long can a datasafe HX battery last?

DataSafe HX top terminal batteries can be safely recharged at high current rates. DataSafe HX top terminal batteries can be stored for up to six months at 77°F (25°C) before a freshening charge is required. At higher temperatures this time interval will be reduced. We understand that data centers are heavily reliant on batteries for backup power.

What is a datasafe DX battery?

The DataSafe DX range of flooded lead-calcium flat plate batteries has been designed for use in UPS applications, more specifically large data centers, which demand the highest levels of security and reliability. The reliability of DataSafe DX as a leading high rate performance battery is backed by 20+ years of experience in the marketplace.

DataSafe HX batteries are the ideal source of power to protect vital systems. The DataSafe HX batteries incorporate select design features that maximize reliability while ensuring superior performance and an excellent service life. 12HX150-E Battery Features and Benefits, : 12 Volt 38 AH - 150Watt; Size 7.8 " x 4.9" x 6.7" 32 lbs.

Specifically developed for high discharge rate applications, DataSafe HX batteries are available in high power density 6, 12 and 16 volt monoblocs. The VRLA technology ensures high power density and eliminates the need for watering, while their lead-calcium-tin alloy plates support efficient recharge rates and long lifecycles.

More Power in Less Space Used primarily where high power is required for a short duration, DataSafe NPX batteries offer 50%... (817) 439-6190 (817) 439-6190. CA. CA. TX. TX. FL. FL. Request a Quote. The newest EnerSys battery brand was developed to address this need: the DataSafe battery series, which is based on the company's Thin Plate Pure Lead (TPPL) technology but further optimized to meet the specific demands of today's UPS systems. This new battery offers a range of features that make it uniquely suited to the modern critical UPS ...

The DataSafe 12HX680F-FR battery offers the convenience and lower maintenance costs of a front terminal battery design but still delivers the power required for demanding high rate UPS applications. This latest offering now expands the UPS Valve Regulated Lead Acid (VRLA) front terminal offering to include both 12V (680 WPC) and 16V (550, 800 ...

The DataSafe DX/DXC range of flooded lead calcium flat plate batteries has been designed for use in UPS applications, specifically large data centers, which demand the highest levels of security and liability. The proven reliability of DataSafe DX battery is backed by 20+ years experience in the marketplace.

The DataSafe CX-M battery was designed for easier maintenance since all the posts and connectors reside above the cell cover; maintenance routines, including individual cell monitoring and intercell resistance measurements are ...

The EnerSys 12HX330 Datasafe Battery is a valve-regulated lead-acid battery designed to offer superior solutions for the Information Technology and Uninterruptible Power Supply markets. DataSafe HX batteries are the ideal ...

Compared to conventional monobloc Valve Regulated Lead Acid (VRLA) batteries, DataSafe XE batteries offer long life, faster recharge times, lower energy consumption, and a wider operating temperature range. The result is greater reliability with Total Cost of Ownership (TCO) savings of up to 25 percent.

TPPL technology gives DataSafe HX+ batteries excellent energy density, long design life, and fast, flexible recharging capabilities - all while reducing energy consumption and costs vs. conventional lead acid batteries. Request a Quote. Wide Wpc range of front and top terminal monoblocs ; Specifically designed for high-rate discharge applications

DataSafe XE Batteries . Engineered to meet the evolving needs of today's datacenters, DataSafe XE batteries support high-rate discharge runtimes optimized for less than five minutes. Featuring advanced Thin Plate Pure Lead (TPPL) technology, DataSafe XE batteries are an ideal solution for new hyperscale datacenters where reliability, operating costs and space ...

Specifically developed for high discharge rate applications, DataSafe HX batteries are available in high power density 6, 12 and 16 volt monoblocs. The VRLA technology ensures high power density and eliminates the need for watering, ...

The EnerSys 12HX300 DataSafe Battery is a high quality sealed lead acid rechargeable battery that is engineered to provide superior performance and long service life. This battery is a maintenance-free, non-spillable valve regulated sealed lead-acid battery. These valve-regulated lead-acid batteries have been designed to offer superior ...

This unique battery combines the power of 12V with a low level of gas evolution, earning its approval for air freight applications. The EnerSys 12HX300 DataSafe Battery meets UL safety standards and is suitable for use in offices, cabinets, ...

The EnerSys 12XE1150F-FR DataSafe battery has been developed to meet the challenging demands of the modern UPS market sector. Conventional Uninterruptible Power Supply (UPS) batteries that historically focused on a 15-minute rate discharge have become increasingly ineffective in fulfilling the growing need for sub-five-minute autonomies.

EnerSys DataSafe NPX-35 Lead Acid Battery. EnerSys DataSafe NPX-35T Lead Acid Battery. EnerSys DataSafe NPX-50TFR Lead Acid Battery. EnerSys DataSafe 12HX205-FR Lead Acid Battery. Need help? Contact our sales & service team at (817) 439-6190, Mon - Fri, 7am - 6pm CT. Company. Order Status. Request an RMA. Contact Us.
