

What is Dynamis Energy?

Dynamis Energy is a company that provides technology solutions to transform stranded and discarded waste into energy and other useful products. Dynamis Energy's technology for converting waste to energy is more environmentally sound than landfill and earlier waste destruction and energy creation processes.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

What happened to Syria's electricity sector in 2021?

In 2021, Syria's Ministry of Electricity estimated total losses to the electricity sector at USD 2.4 billion due to infrastructural damage and acute shortages of fuel and water needed to power Syria's thermal and hydroelectric infrastructure.

How many power plants were destroyed in Syria?

Violence and looting destroyed three major power plants in Syria between 2015 and 2017: the Aleppo Thermal Station, Zaytoon in Idlib, and al-Taim in Deir Ezzor. Pre-war, these three plants accounted for almost one-fifth of Syria's total generation capacity.

How many barrels of oil does Syria produce daily?

Syria produced 400,000 barrels per day (64,000 m³/d) in 2009 and exported about 150,000 barrels per day (24,000 m³/d). The country's oil reserves were estimated to be 2.5bn barrels in 2010. The Syrian Petroleum Company (SPC) is a state-owned oil company established in 1974.

It was the sixth Russian Energy Week (REW) held under the theme "The New Reality of Global Energy: Building the Future" and gathered over 4,000 participants from more than 60 countries, including government representatives, executives of major energy companies and organisations, scientists and experts.
