

What is the Kiribati energy roadmap?

The KIER is Kiribati's comprehensive energy roadmap, which takes into account renewable energy and energy efficiency potential in all sectors from 2017 to 2025.

Does Kiribati need electricity?

As a small, remote island state, Kiribati is highly dependent on imported energy supply. Electricity is one of the government's largest expenditures. Yet the current fossil fuel-based power system is inadequate to meet future demand.

Should solar PV be deployed in Kiribati?

The findings of this roadmap show that power sector is a key area, where the ongoing efforts from the deployment of solar PV should be continued and complemented with an improvement of efficiency in Kiribati's entire energy system, including electricity use, heating, cooling, and transport.

E-star Energy | 772 (na) tagasubaybay sa LinkedIn. Let global users use safe and efficient new energy easily. | Xiamen E-star Energy Co., Ltd. established in 2003, focuses on providing advanced distributed photovoltaic products, energy storage products and smart energy management solutions for residential and commercial users.
