

Which EnerSys®; Cyclon battery is best?

At high-rate and pulse discharges, EnerSys®; CYCLON batteries offer the best performance value when compared with competitive product in applications at less than 100 minutes of discharge. Cycle life - Compared to competitive lead products (offering up to 200 full cycles), pure lead batteries provide 50% to 200% greater full cycle capability.

How big is EnerSys®;?

EnerSys®; is there. 32,000 square feet and is situated on 33 acres. from repeated recharges. and far more power. in any position. temperature, and flammability protection. Cyclon. Corporation in 1973. The purity of the materials used is key to supporting the CYCLON®; battery's performance benefits.

Are Cyclon batteries safe?

Constructed of high-purity materials, CYCLON®; batteries are engineered to provide longer service life, high reliability and with fewer replacements. Safe enough for installations in offices or hospitals. From general purpose to extremely demanding applications, CYCLON batteries offer better performance and lower long-term cost of ownership.

How long do Cyclon batteries last?

CYCLON batteries will deliver up to 300 cycles (100% DOD, C/5). And, because CYCLON batteries incorporate a high vent-pressure design, EnerSys products experience no "dry out" failure mode from repeated recharges. Conventional sealed-lead batteries vary 3. Float life greatly in specified standby life: from three to six years at 20°C, C/20.

What is a Cyclon battery single cell?

CYCLON battery Single Cells offer UL 94V-0 flame-retardant packaging, thus allowing the mounting of systems in sensitive areas and human environments. Plus, the unique and flexible 2-volt CYCLON battery Single Cell allows you to design your system using an almost infinite number of packaging/design configurations. or "NONSPILLABLE BATTERY".

Where are EnerSys batteries made?

The EnerSys®; plant in Warrensburg, Missouri covers 32,000 square feet and is situated on 33 acres. A 50-PSI vent lets gases escape, then automatically reseals, so there's no risk of excessive gas accumulation within the battery, or "dry out" failure from repeated recharges.
