

What is the relationship between energy and development in Eritrea?

The energy-development relationship has numerous social and political implications in Eritrea, where access to modern energy services is still very low and where about 66% of the population lives below the poverty line .

Does Eritrea have a energy sector?

The Government of Eritrea gave priority status to the energy sector immediately after the country's independence in May 1991, as manifested by the rapid improvement in electricity and oil supplies. Electricity generation capacity has increased from a total of 30 MW in 1991 to over 130 MW at present.

Is the Eritrean government facilitating oil & gas exploration?

The Eritrean government is facilitating oil and gas exploration, examining the potential of geothermal energy generation, and open to utilizing excellent wind energy resources as a driver to export-oriented industrial growth, but these scenarios are fairly speculative at this stage, and thus beyond the scope of the present study.

What is an aggressive energy transition in Eritrea?

In Eritrea an aggressive energy transition would be characterized by a move from the present energy use patterns, based on animal power and biomass resources, to a situation where households, services and farming activities use a range of sustainable and diversified energy sources.

What percentage of Eritrean people have access to electricity?

About 70% of the Eritrean population, which lives in rural areas, has little or no access to modern energy services. At a national level, access to electricity is about 32%, but only 3% of the rural population has access, compared to 78% in urban areas though 99% of the population of Asmara, the capital city, have access to electricity .

How much does electricity cost in Eritrea?

The current electrification rate (fraction of people with access to electricity) in Eritrea is about 20%, and as complete electrification is attained, we can expect national expenditures approaching 50 to 100 USD per household per year for electricity supply.
