

What does Gurn energy do?

At Gur'n Energy, we develop solar, wind and energy storage projects to support Asia's sustainable development journey. Jindo Green Solar, located in the south of the country, will become one of South Korea's largest solar power plants.

Why is energy important for Ethiopia?

Energy is one of the most significant sectors for Ethiopia's economic growth and development and is expected to increase significantly in the medium run. Ethiopia has abundant renewable energy resources and the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric, wind, solar, and geothermal sources.

What is the Ethiopia-Kenya Electricity Highway (EAPP)?

The EAPP is one of five power pools in Africa, which, with the help of interconnectors, could one day link together the energy supplies of every region in the continent. The Ethiopia-Kenya Electricity Highway is one of many interconnector projects in Africa.

How much electric power can Ethiopia generate?

Ethiopia has the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric, wind, solar, and geothermal sources. In addition, in 2022 the GOE certified the presence of seven trillion cubic feet of natural gas reserves in the Ogaden Basin.

How does Ethiopia produce electricity?

The country focuses on the production of electricity from a mix of cheap and clean renewable primary energy sources like hydropower or wind power. Ethiopia has a total identified economically feasible potential of 45 GW of hydropower and 1,350 GW of wind power.

Who owns Gurn energy?

Gur'n Energy is owned by its management team and Infratil Ltd, a listed infrastructure investment company with established renewable energy platforms in the United States, Europe and Australia and a development pipeline of over 30GW. Infratil Ltd is managed by Morrison, a global infrastructure investment company.

Ethiopia possesses abundant wind resources that have the potential to revolutionize its energy sector by providing reliable and sustainable electricity through wind power. Despite the presence of a few operational wind farms, the country is facing challenges in generating sustainable electricity. The slow progress in wind power development raises ...
