

How much power does Saudi Arabia need?

Saudi Arabia has established a goal to source at least 50 percent of its power from renewable energy by 2030, expanding its capacity to 130 gigawatts (GW), 58.7 GW of which is expected to come from solar and 40 GW from wind. This target is the most ambitious of its kind among Gulf Cooperation Council (GCC) countries (Figure 1).

Why is Saudi Arabia partnering with China?

These partnerships provide Saudi Arabia with advanced technology and financing options while allowing China to secure vital energy resources, strengthen its Belt and Road Initiative, and gain greater access to Middle Eastern energy markets.

What will Saudi Arabia's economy look like in 2025?

Government gross debt is expected to surpass 30 percent of GDP in 2025 and the current account balance is projected to fall into the red. Saudi Arabia's trade picked up after the 2020 pandemic, but its export rate plummeted in 2023. Imports and exports are projected to grow in 2025 and the years that follow, but at a slowing rate.
