

How much energy does Slovenia produce?

Slovenia generated 68.8% of its electricity with zero carbon or carbon neutral sources in 2019, dominated by nuclear power and hydroelectricity. Fossil fuels oil, coal, and natural gas contributed 61% of the total energy supply of Slovenia in 2019.

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

Does Slovenia have natural gas?

Slovenia has essentially no natural gas or petroleum reserves or production. The possibility of a gas pipeline with Hungary has been proposed for years, a pipeline exists to the border with Hungary, but as of 2023 it has not been connected to Hungary.
