

Who owns the electricity in Panama?

The electric sector in Panama is controlled by the private sector with the exception of the transmission company, which is fully-owned and operated by the government. The Panamanian market is receptive to U.S. electrical power equipment.

How much electricity does Panama produce?

Panama produced 10.9 TWh of electricity in 2020; hydro power accounted for 67.2% of all power generated, followed by fossil fuels (24.3%), wind (5.3%), solar (2.9%) and other renewable sources (0.3%).

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

Who regulates the electricity sector in Panama?

The ASEP (Autoridad Nacional de los Servicios Públicos) is responsible for regulation of the electricity sector in Panama. The ASEP oversees all aspects of Panama's electrical sector. Panama does not have a national oil company. Naturgy is the leading energy distributor in Panama.

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.
