

What is Himawari solar lighting system?

LA FORET ENGINEERING CO.,LTD. (Mori Building Group) Copyright (C)2022 LAFORET ENGINEERING CORPORATION. All rights reserved. Himawari solar lighting system brings real natural sunlight indoor by using the convex lens and quartz glass optical fiber cables. Let natural light light up your house to improve the life quality.

How does the Himawari solar lighting system work?

The Himawari solar lighting system works by directly collecting sunlight using a sunlight collector (lens focusing unit) and quartz glass optical fiber devices. It also features an automatic tracking system and is covered by an outer acrylic dome. The natural light from the sunlight is harnessed instead of using electronic energy like regular LED lights.

How much light does a Himawari system emit?

Light is emitted at a spread angle of 58° from the edge of an optical cable. At two-meter from the end of the optical fiber, an approximately 1.5-m diameter circle region is illuminated at approximately 1,036 lux on average (per cable) and one Himawari system is equipped with two cables.

How much does Himawari cost?

Since the HIMAWARI system screens out ultraviolet rays, it protects furniture and carpets from color fading. The running cost of the HIMAWARI system is approximately 1 yen a day when equipped with a twelve-lens collector. By using an energy-saving type system that is powered by solar cells, you can reduce the electricity cost to zero yen.

Does Himawari capture sunlight?

Therefore whenever where you are, Himawari can always capture sunlight for you. Note: 12 lens Himawari only needs 2W power consumption to provide power for the movement of Himawari when it keeps tracking and following the direction of the sun.

Can I switch between the Himawari and artificial illumination systems?

We have an automatic dimmer system available which allows you to switch between the Himawari and artificial illumination systems. Sunlight is condensed about 10,000 times through a highly efficient lens.

Himawari solar lighting system, Minato-ku. 416 likes &#183; 4 talking about this. La Foret Engineering Co. (Mori Building Group), founded in 1991, provides natural lighting solution. Himawari Solar...

The diurnal variation of surface incident solar radiation ( $R_s$ ) has a significant impact on the Earth's climate. Satellite-retrieved  $R_s$  datasets display good spatial and temporal continuity compared with ground-based observations and, more importantly, have higher accuracy than reanalysis datasets. Facilitated by these

advantages, many scholars have evaluated ...

Himawari not only illuminates your life with real sunlight but also let you sunbathe indoors without ultraviolet light. Himawari system is equipped with an automatic tracking system to accurately detect sunbeams and continuously changes its ...

El sistema Himawari<sup>®</sup>; consta de una unidad de lentes que enfocan la luz solar en unos terminales de cables de fibra óptica. La fibra óptica transporta esa luz, de la forma más eficaz, hasta el punto donde se necesite (hasta 150 m de distancia). Está dotado de un sistema de seguimiento automático para detectar con precisión la posición del sol y obtener el máximo ...

2.1 Himawari-8 estimates of surface downwelling solar radiation. The Advanced Himawari Imagers (AHIs) aboard Himawari-8 acquire full-disk observations in 16 observation bands (three for visible, three for near-infrared, and 10 for infrared wavelengths) every 10 min (and over Japan every 2.5 min), with a spatial resolution ranging from 0.5 to 2 km (Bessho et al., 2016).

Abstract. This paper presents an online platform showing Thailand solar irradiance map every 30 minutes available at <https://> methodology for estimating global horizontal irradiance (GHI) across Thailand relies on cloud index extracted from Himawari-8 satellite imagery, Ineichen clear-sky model with locally-tuned Linke turbidity, and machine ...

A calibrated physics-based method to estimate the surface solar irradiance (SSI) from the Advanced Himawari Imager (AHI) sensor on the geostationary Himawari-8 satellite was developed. While major factors

influencing SSI were considered by the physical modelling step, minor factors were accounted for through a calibration step against in - situ ...
