

Is India ready for a massive solar equipment manufacturing ecosystem?

Those are just the beginning of a massive solar equipment manufacturing ecosystem evolving in the country, targeting both the domestic and export markets. In the first half of the year 2024, India added a record 11.3 GW of solar modules and 2 GW of solar cell capacity.

How many solar cells are produced in India in 2024?

In the first half of the year 2024, India added a record 11.3 GW of solar modules and 2 GW of solar cell capacity. With that, the country's cumulative manufacturing capacity reached 77.2 GW in modules and 7.6 GW of cell capacity. Gujarat alone accounts for 45% of module manufacturing and 52% of cell manufacturing.

Will India become a major force in solar equipment manufacturing?

With huge capacity addition happening in solar equipment manufacturing and developed nations looking at sourcing from countries other than China, India is set to become a major force in solar equipment making. Follow us on Facebook, X, YouTube, Instagram and WhatsApp to never miss an update from Fortune India.

What are India's Solar Exports?

India's solar exports rose 227% to \$1.8 billion in 2023 from \$561 million in 2022 and the US accounted for over 97% of Indian exports. The rest were from Indonesia and a couple of African countries. With more developing countries embracing solar and other renewable energy, opportunities are growing for Indian solar equipment makers.
