

What are solargaps smart blinds?

SolarGaps smart blinds are the first blinds that automatically track the sun and generate electricity from its energy while keeping your apartment or office cool.

What is SolarGaps?

SolarGaps is a company that has been on a mission to make energy free and accessible to all since 2015. They are pioneering a method of energy distribution that will power offices, homes, and cities of the future. By exploring innovative concepts and adopting new technologies, SolarGaps can help move every city closer to their Net Zero goals.

Who makes solar panels in Indonesia?

From a historical standpoint, firms based in China and Japan have dominated the market, with the presence of Indonesian firms largely limited to the six companies comprising the Indonesian Solar Module Manufacturer Association (APAMSI): PT. Len Indonesia (Persero), PT. Adyawinsa Electrical & Power, PT. Surya Utama Putra, PT.

How much electricity does a solar gap use?

Only 1 small window of around 1 sqm with our SolarGaps facade blinds can reduce electricity usage for 100 Watts per hour. The SolarGaps system consists of solar panels connected by a durable steel cable or by rigid guides to ensure secure attachment, even when the wind is strong.

Why should you choose solargaps facade blinds?

SolarGaps facade blinds automatically adjust the angle of its blinds for the most effective shading performance and solar power production. Our smart blinds are mounted on the outside of the building and serve as a heat shield which helps to maintain a comfortable room temperature.

How long do solargaps blinds last?

Strong metal blinds will protect your apartment from burglars while mobile app account protection makes these smart blinds pointless to steal. The warranty of SolarGaps is two years, with a lifespan of at least ten years. Blinds come in a variety of colors. Visit our gallery to see how SolarGaps looks once installed.

Le tapparelle SolarGaps saranno collegate al tuo smartphone tramite Wi-Fi. Perché l'app SolarGaps funzioni perfettamente, è necessario un segnale di alta qualità con una velocità non inferiore a 1 Mbps. Indipendentemente da dove ti trovi nel mondo o da quanto sei lontano da casa, puoi comunque controllare la posizione delle tapparelle.
