

Who supplied electricity to the Isle of Man?

The Douglas Corporation and the Isle of Man Electricity Board were the sole suppliers on the island, apart from small areas supplied by the Manx Electric Railway Company. By the mid-1950s the Pulrose power station of the Douglas Corporation had a total generating capacity of 15.475 MW. This comprised the following plant: Coal-fired boilers:

When did the Isle of Man become part of the Utilities Authority?

In 2014 it became part of the Manx Utilities Authority when it was merged with the Isle of Man Water and Sewerage Authority. Following the First World War the development of utilities on the Isle of Man was considered essential.

What is the Manx Utilities Authority?

The Manx Utilities Authority (Manx: bun shirveishyn vannin) is a Statutory Board of the Isle of Man Government which provides utilities for the Isle of Man. It was created in 2014 by the merging of the Manx Electricity Authority with the Isle of Man Water and Sewerage Authority.

How does Manx Gas generate electricity?

We generate electricity on Island and also procure electricity using an AC power interconnector marine cable. We provide natural gas via our gas pipeline for electricity generation and supply Manx Gas. We provide an energy trading service, in particular the sale of surplus electricity to the UK.

The Authority is responsible for providing customers with safe, reliable, efficient and economic supplies of electricity, natural gas and clean water; as well as processing waste water. Manx Utilities has two subsidiary businesses on commercial telecommunications and subsea cable management. Manx Utilities Authority is responsible for the generation, transmission and dist...
