

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

How much oil does Kazakhstan produce?

It produces more than twice as much crude oil as Azerbaijan but around half the natural gas produced in Turkmenistan. Kazakhstan's total energy production (178 million tonnes of oil equivalent [Mtoe] in 2018) covers more than twice its energy demand. Kazakhstan is also a major energy exporter.

Will Kazakhstan's Energy Transition be a model for other countries?

Kazakhstan's progress on the energy transition can serve as a model for other countries in the region and beyond on advancing a just transition away from fossil fuels—helping to build a more sustainable, resilient economy for all.

Is Kazakhstan phasing out inefficient subsidies and modernizing its energy infrastructure?

Kazakhstan's energy sector has long been dependent on fossil fuels, and the country now faces the challenge of phasing out inefficient subsidies and modernizing its energy infrastructure.

Is Kazakhstan a major energy exporter?

Kazakhstan is also a major energy exporter. In 2018, it was the world's 9th-largest exporter of coal, 9th of crude oil and 12th of natural gas. In 2018, Kazakhstan's energy consumption (measured by total primary energy supply) was 76 Mtoe, comparable to consumption in the Netherlands (73 Mtoe).

What is the main energy publication of the Republic of Kazakhstan?

The main energy publication is the annual Fuel and Energy Balance of the Republic of Kazakhstan. It contains annual data on energy supply and demand in physical and energy units with sectoral breakdowns, as well as energy intensity indicators.

About . Energy Storage Partnership (ESP) ESP is a global partnership convened by the World Bank Group to foster international cooperation to adapt and develop energy storage solutions for developing countries. Today, the unique requirements of developing countries' grids are not yet fully considered in the current battery storage market - even though ...

ASTANA - Energy Week Central Asia and Caspian 2024 took place on Sept. 5-6 in Astana, focusing on the region's green transition. The event featured in-depth discussions on policy and regulatory frameworks, financing renewable energy, and technology-specific projects, including solar PV, storage, wind energy, green hydrogen, and hydropower.
