

What is the energy strategy in Kosovo?

The main policymaking document in the energy sector in Kosovo is the Energy Strategy (hereafter: the Strategy). The Strategy is drafted by the Ministry of Economy, covers a period of ten years and has to identify the main challenges that the sector faces and outline the policies to develop the sector.

Could a battery storage system save Kosovo's Energy costs?

In fact, a 2018 study by the World Bank, which had for years supported the construction of Kosova e Re, found that if taking carbon and pollution costs into account, a combination of renewables and battery storage would be the most cost-effective solution for Kosovo's electricity sector.

What is the energy mix in Kosovo?

The other generation capacities in Kosovo come from hydropower plants while renewables are less represented in the energy mix although their representation has been rising in the last decade. Currently, Kosovo has 137 MW installed wind capacity and 10 MW installed solar capacities.

How secure is electricity supply in Kosovo?

Security of electricity supply depends on a fleet of aged coal-fired power plants built between the 1960s and 1980s owned and operated by the Kosovo Energy Corporation, one of the biggest public enterprises in the country. The uptake of renewables has been slow with a limited number of support measures in the last decade.

Is electricity a profitable business in Kosovo?

Electricity generation represents its main business, while its dominance in the sector has made it one of the most profitable state-owned enterprises in Kosovo. Kosovo initially planned to develop new generation capacities, competitively contracting a private company to build and operate a lignite-fired power plant.

What happened to Kosovo's lignite power plant?

However Kosovo's progress in developing renewable energy was hampered for many years by plans for a new 500 MW lignite power plant - Kosova e Re - which diverted efforts and resources from the development of more sustainable forms of energy. It was only in early 2020 that the project was finally abandoned.
