

What is the Liberia Electricity Corporation (LEC)?

The Liberia Electricity Corporation (LEC) is a public utility created in 1973 by the Government of the Republic of Liberia. This entity was developed through an act of Legislature with a mandate to produce and supply economic and reliable electric power to the entire nation, while at the same time maintaining the corporation financial viability.

What is the sustainable power source in Liberia?

In Liberia, sustainable power is harnessed from tight-knit communities to provide life-changing products and services, starting with access to solar electricity. Electricity creates opportunities -- opportunities to learn, communicate, start a business, and build a better life.

What is the cost of electricity in Liberia?

The tariff on generator usage in Liberia is estimated to be approximately US\$3.96/kWh, which is around 14 times higher than the LEC tariff, according to Options for Development of Liberia's Energy Sector. The document also mentions that the consumption of thermal energy in the form of charcoal and firewood costs Liberia about 960,000 trees per year.

Why is electricity important in Liberia?

Electricity is important in Liberia because it creates opportunities, such as learning, communication, starting a business, and building a better life. Unfortunately, less than 1% of rural Liberians have access to electricity. However, reliable, safe electricity is now affordable for nearly anyone. LIB Solar focuses on mobilizing communities instead of selling to individual customers to achieve economies of scale.

How many people in Liberia have access to electricity?

Fewer than 1% of rural Liberians have access to electricity. LIB Solar focuses on providing reliable, safe electricity to these communities by mobilizing communities instead of selling to individual customers. Each community receives high-quality solar systems that provide lighting and phone charging.
