With an SK-built 82-kWh battery pack, the ID.4 can accept a charging rate of 170-kW instead of 135-kW with an LG battery pack. That means quicker charge times. While it takes 36 minutes for an LG-supplied 82-kWh battery pack to go from 10% to 80%, a battery pack from SK can go from 10% to 80% in just 30 minutes. ...

With an impressive revenue of \$2 billion and dedicated team of over 3,0000 employees, we provide high-energy density battery cells to top automotive ...

The SK battery charges DCFC 6 minutes faster to 80% under certain ideal conditions that will probably occur less frequently than you think. Would that actually be worth something significant? My understanding is that other than this, the batteries are functionally equivalent -- AC charging is the same, for instance. So IRL probably not a real ...
