The Xlinks solar & wind power project in Morocco will be developed near Tan-tan in the region of Guelmim-Oued Noun in the southwestern region of the country. It will be made up of 7 GW of solar capacity (larger than the 1.65 GWp Benban complex in Egypt) and 3.5 GW of wind. In total, the power plants will produce 10.5 GW of electricity.

particularly as Morocco's exports begin shifting to high productivity sectors. To this end, this paper explores recent trends in Morocco's ULC-based REERs, presents an empirical analysis of the impact of changes in REER on Morocco's external position, and discusses relevant policy considerations. B. Recent Trends in Morocco's REER 4.

However, since Golden Century DLC enabled, the Morocco mission tree allows Morocco to get Tuat freely to open up a path to a number of weak countries in Sub-Saharan Africa. That should be easy to conquer. Timbuktu is a valuable target. In addition to the usual benefits of colonization, Morocco can use it to provide new coasts to raid.
