

What is a radioisotope storage cabinet?

The Radioisotope Storage Cabinet is designed for safely storing radioactive materials. It features 12 key-locked drawers. Each drawer is easily removed for cleaning or decontamination. A card slot identifies contents. View our complete range of Lead-Lined Storage Cabinets.

What is a radioactive storage cabinet?

Cabinets for storage of radioactive material, contaminated material or waste material. The cabinets are manufactured from steel and feature integrated lead shielding. With the lead shielding being integrated into the sidings of the cabinets it is not accessible to the operator ensuring very high levels of lead hygiene.

What is a shielded radioactive sample storage cabinet made of?

The frame, tabletop and side boards of the shielded radioactive sample storage cabinet are made out of stainless steel to give a clean look and provide cleanability. This shielded radioisotope storage cabinet can be shielded with 6, 12.5 or 25 mm of lead shielding on all sides and in the front panels of the drawers.

What is a modular shielded radioisotope storage cabinet?

Modular shielded radioisotope storage cabinet with three drawers. The dimensions of our modular shielded cabinets are exactly the same, which means all our lead lined cabinets can be placed next to each other without big spaces, enabling you to easily upgrade your hot lab setup whenever there is a budget.

How do you store radioactive materials?

Storage of radioactive materials requires the use of radiation shielding. The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container.

How can radioactive materials be shielded?

The radioactivity can be shielded by placing the radioactive materials into a shielded containment such as a lead shielded cabinet, lead shielded safe or a lead shielded container. Nuclear Shields is a radiation shielding manufacturer and designs shielding solutions for storing radioactive materials.
