

The Energy Fact Book provides key information on energy markets in Canada in a format that is easy to consult, providing solid foundation for Canadians to understand and discuss important developments across the energy sector.

It is intended to create a broad space for discussion around the relationship between energy sources and resources, on the one hand, and human societies and the environment, on the other, in the past as well as in the present. Over time, in different geographic spaces and historical contexts, we can find dominant energy sources in human activity.

In his 2011 book *Carbon Democracy: Political Power in the Age of Oil*, Timothy Mitchell argues that the materiality of energy has a profound impact on politics and governance. If, as Mitchell believes, fossil fuels can explain a great deal about the evolution of political structures and democracy, how have Canada's hydro-electric resources historically impacted the nation's ...

This piece is the second in a series of blogs about the Canadian Energy Museum, a small museum situated in the town of Devon, Alberta that is facing imminent closure due to the loss of funding. The goal of these blogs is to share some of the Canadian Energy Museum's rich collection with the broader community of environmental historians and museum ...

1 ??· The leader of Ontario, Canada's most populous province, has suggested barring imports of American-made alcohol and restricting energy exports. But the head of oil-rich Alberta has ruled out cutting off oil exports and hopes to find a ...

This post is part of #AltASEH2020, a special series published by NiCHE based on research and presentations that could not be presented at the 2020 annual meeting of the American Society for Environmental History due to the COVID-19 pandemic.

The final NiCHE New Scholars virtual meeting for this year took place on May 2. A huge thanks is owed to Heather Green - soon to be joining the History Department at St. Mary's University - who has coordinated the New Scholars group this year. Heather's dedicated energy ensured that this meeting on energy history, which had to be delayed on two occasions, still ...

He is an editor for *The Otter-La loutre* and is part of the NiCHE executive. A transnational environmental historian who focuses on Canadian-American border waters and energy issues, particularly in the Great Lakes-St. Lawrence basin, Daniel is the author or co-editor of six books on topics such as the St. Lawrence Seaway, border waters, IJC ...
