

Where can I find information about energy in Niger?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Niger on the IEA homepage. Find relevant information for Niger on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How can Niger improve energy access?

Broadening energy access is a central national development objective in Niger. At present, less than 25% of the population enjoys access to electricity, and the picture in rural areas is bleaker, at less than 5% electricity access. Generation of electricity through renewables has long been viewed as an important way to close this gap.

Does Niger need reliable electricity?

The Government of Niger views providing reliable electricity and other basic energy services to all populations and parts of the country as a critical aspect of its inclusive economic transformation plans. It also recognises decentralised renewable energy options as a cost-effective alternative to grid expansion in many rural areas.

Is energy access a critical barrier to development in Niger?

Energy access in Niger remains a critical barrier to the country's development. Modest improvements have been experienced in recent years. However, electricity access in Niger remains low at about 24% and almost all the population relies on the unsustainable use of traditional biomass (MP/AT-DC, 2011).

Why is access to energy a problem in Niger?

Despite this rich potential, access to energy is still a challenge for the authorities. Final energy consumption in Niger is estimated at 0.15 toe per capita, one of the lowest in the world. The weakness of this value is mainly due to limited access of Niger's households to modern energy.

How can Niger balance its energy mix?

This transformative project, funded by the World Bank through the International Development Association (IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy. This initiative is particularly crucial for a country that frequently faces climatic shocks.

Africa-Press - Niger. La Société Nationale de Production d'Électricité (SONIDEP SA), représentée par son Directeur Général, le Colonel Ali Seibou Hassane, et la Société Nationale de Production d'Énergie, représentée par son Président Directeur Général, M.
