

What is Panama's energy supply?

This page is part of Global Energy Monitor's Latin America Energy Portal. Panama currently relies on imported oil for the majority of its total energy supply. In the electrical sector, hydro energy also plays a key role, accounting for 43.9% of installed capacity and 67.2% of total generation as of 2020.

What is Panama's Plan Energético Nacional?

The PEN (Plan Energético Nacional) 2015-2050 aims to drastically increase the use of renewable energy in Panama to 70% of the country's energy mix. Panama aims to be carbon neutral by 2050, partially by emphasizing forest restoration to absorb CO2 emissions.

How much energy does Panama need?

Panama expects total energy demand to more than double between 2017 and 2030 (+113%), with peak demand growing from 1.6 GW to 3.5 GW. Panama is currently connected to Costa Rica via a 300 MW transmission line. A 400 MW high-voltage direct current (HVDC) interconnector with Colombia is expected to be commissioned by 2022.

Who is responsible for energy distribution in Panama?

Three distributors are responsible for energy distribution in Panama: ENSA, Edemet, and Edechi. Electricity is distributed via Panama's nationally interconnected system (SIN). Electricity prices are impacted by weather patterns because of Panama's use of hydropower.

Is biomass a source of electricity in Panama?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Panama: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Who regulates the electricity sector in Panama?

The ASEP (Autoridad Nacional de los Servicios Públicos) is responsible for regulation of the electricity sector in Panama. The ASEP oversees all aspects of Panama's electrical sector. Panama does not have a national oil company. Naturgy is the leading energy distributor in Panama.

Panama: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all ...
