

Why does the Philippines need a lot of electricity?

It is expected that the country's demand for power will increase as the Philippines' population and economy continue to grow. The Philippines' current energy mix highly favors fossil fuels, with coal, natural gas, and oil, accounting for 73.56% of the country's total electrical energy needs, primarily due to their low cost.

Does the Philippines generate electricity from oil?

The Philippines also generates a significant amount of electrical energy from oil, albeit to a lesser degree than compared to coal and natural gas. In 2013, the Philippines sourced 5.97% of its energy from oil-based sources.

What type of energy does the Philippines use?

The Philippines' current energy mix highly favors fossil fuels, with coal, natural gas, and oil, accounting for 73.56% of the country's total electrical energy needs, primarily due to their low cost. The Philippines's most heavily used energy source is coal.

What is the Philippine Energy Plan 2020-2040?

The Philippine Energy Plan (PEP) 2020-2040 is the second comprehensive energy blueprint supporting the government's long-term vision known as Ambisyon Natin 2040. This updated plan, like its predecessor (PEP 2018-2040), reiterates the energy sector's goal to chart a transformative direction towards attaining a clean energy future.

Is the Philippines reliant on Imported liquified natural gas (LNG)?

Source: Philippine Energy Statistics, Department of Energy. Energy supply in the Philippines is highly reliant on imported oil and coal and will soon be reliant on imported liquified natural gas (LNG) due to dwindling domestic gas production. Philippines is almost

How to prepare a framework for a just energy transition in the Philippines?

A comprehensive cross-sectoral approach will be required to properly prepare a framework for a just energy transition process in the Philippines, involving early on key stakeholders in a consultative planning process, including government, private sector and communities in the affected areas.
