

What does Romania's new energy minister say about energy security?

In an in-depth conversation, Romania's new Minister of Energy Sebastian-Ioan Burduja reveals the Government's plans for a sustainable energy development, but also speaks of Romania's role in enhancing energy security and stability in the region.

What is energy in Romania?

Energy in Romania describes energy and electricity production, consumption and import in Romania. Romania has significant oil and gas reserves, substantial coal deposits and it has considerable installed hydroelectric power. However, Romania imports oil and gas from Russia and other countries.

Who produces electricity in Romania?

Electric power was provided by the Romanian Electric Power Corporation (CONEL). Energy sources used in electric power generation consisted primarily of nuclear, coal, oil, and liquefied natural gas (LNG). The country has two nuclear reactors, located at Cernavodă, generating about 18-20% of the country's electricity production.

How much does a Romanian nuclear reactor cost?

Romanian state-owned nuclear power producer Nuclearelectrica has signed the main engineering contract to extend the life of its first reactor at a cost of about 1.9 billion euros (\$1.98 billion), it said on Thursday.

Is biomass a source of electricity in Romania?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Romania: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How has the energy crisis impacted the economy in Romania?

The subsequent energy crisis, escalating energy and gas prices, and the mounting expenses associated with carbon dioxide (CO<sub>2</sub>) emissions have resulted in an unprecedented surge in inflation, unlike anything witnessed in recent years.
