

How will energy storage benefit Saint Lucia?

These diverging interests make it difficult to secure a successful contract that benefits Saint Lucia. Energy storage, in the form of batteries, will play a role in the Saint Lucia electricity system by avoiding reserve capacity and facilitating the integration of variable renewable energy.

What is the energy potential of Saint Lucia?

Saint Lucia is a volcanic windward island, with large technical potential for geothermal, wind, and solar renewable energy generation, as well as use of solid waste generated by residents. Little technical potential for biomass or hydroelectric generation exists on the island.

Does Saint Lucia have a good electricity system?

The Government of Saint Lucia believes a well-functioning electricity system underpins a strong national economy, and is committed to ensuring that all citizens have safe, reliable, and cost-effective access to electricity. For decades, Saint Lucians have benefitted from a reliable power supply, but at a cost.

How can energy efficiency programs be implemented in Saint Lucia?

Energy efficiency program implementation-- Deploying a program to encourage cost-effective energy efficiency across different customer groups in Saint Lucia requires funding, staff, and appropriate regulations. If energy efficiency measures are not adopted, electricity loads will remain higher than projected.

Does Saint Lucia need a power supply?

For decades, Saint Lucians have benefitted from a reliable power supply, but at a cost. Our reliance on imported fossil fuels for the generation of electricity has left our small island nation vulnerable to external shocks, due to fluctuations in global oil prices over which we have no control.

What is Saint Lucia's energy transition opportunity?

**RESULTS** Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

Type G is the most common outlet here. Most equipment you have other than hair dryers should work fine, but check the input voltage on your device's plug to make sure it supports 240V, 50hz (you'll generally see 100-240V, 50-60hz). Assuming that's the case then all you need is an adapter, not a voltage converter.
