

What is the energy mix in Senegal?

In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind. Current percentages of power generation:

Who owns Senegal's power?

Senelec owns 15%, while West African Energy controls the remaining 85%. The project, located near Dakar, will use indigenous gas, potentially reducing Senegal's power rates. Turbines are supplied by General Electric, while engineering and construction are handled by Calik Enerji. Sendou - 125 MW

Can Senegal switch from diesel to coal?

Senegal is committed to shifting from a diesel-based power generation to cheaper energy sources. Senegal has thus put an option on the coal technology. The recent bid to build-own and operate a 125 MW coal-fired Sendou power station was awarded to a consortium of companies headed by the Swedish operator Nykomb Synergetics.

Who buys electricity in Senegal?

Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel. The rest is mostly coal and hydroelectricity.

How is electricity generated in Senegal?

Electricity generation, mainly on a build-own-operate (BOO) basis, is open to the private sector. Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel.

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal 2035, or the Emerging Senegal Plan.
