

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

Where can I find total energy balance of the Republic of Serbia?

Total Energy Balance of the Republic of Serbia for chosen year is available [HERE](#). Construction of energy balances according to the old Eurostat concept can be realised on data which are in the database called Annual data - archive. The data were archived by the end of 2017 and will not be corrected in the future.

What is Serbia's energy investment plan?

The Ministry of Mining and Energy has announced a EUR15 billion investment plan for the electricity sector in next several years, expecting to reach more than 3 GW of renewable energy production plants. The main players and investors in the Serbian Energy Sector are:

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

When did Serbia start producing electricity?

On 6 October 1893, the first Serbian power plant, located in the Dorćol urban neighborhood of Belgrade, began production of electricity. In 1900, the first alternating current hydroelectric power plant Podgradom in Užice on the river Zetinja went online.

3 ???&#0183; MVM Group and E.ON have finalized an agreement for the sale and purchase of E.ON's energy retail and customer solutions operations in Romania. As part of the deal, MVM Group will acquire a 68% stake in E.ON Energie Romania and a 98% stake in E.ON Asist Complet. E.ON Energie Romania is a leading gas and electricity provider in the country, ...

Serbia is expected to rapidly transition its production of energy from fossil fuel to renewable energy. Emergy, along with a local partner, is developing Alibunar, which is the most advanced project in our portfolio and will have an installed capacity of 168 MW. The Banat wind projects (I-V), and the Zabalj PV solar project will have a ...

Although the Energy Sector Development Strategy of the Republic of Serbia until 2015 envisages an increasing share of renewable energy (RE) in the total energy balance of the country and although ...
