

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

What is the energy system in Gambia?

The Gambian electricity network mainly consists of minigrids that the government hopes to improve by transforming into hybrid minigrids, integrated with renewable energy generation capacity. With an electricity access rate of just 35%, Gambia introduced the Renewable Energy Act to promote clean energy in 2013.

How much solar power does Gambia have in 2022?

According to the International Renewable Energy Agency (IRENA), Gambia only had 2 MW of installed PV capacity at the end of 2022. Gambian utility Nawec recently started building a 23 MW solar project in Jambur, in Gambia's West Coast Region.

How many PV systems will be installed in Gambia?

Gambia's Sustainable Energy Services Company is launching a tender to install 1,100 PV systems, ranging from 2 kW to 240 kW in size, on 1,000 schools and 99 health facilities.

How does a large scale solar PV project benefit the Gambia?

The project contributes to gainful employment creation in The Gambia with 1,250 direct jobs created from the construction phase to operation and maintenance. To ensure sustainability, a three-year operations and maintenance contract (O&M) has been signed as large scale solar PV is entirely new to the sector.

Project Name: Banjul The Gambia 15KW Off Grid Solar System Date: March, 2023 Project Type: Residential Solar Power System Project Site: Banjul The Gambia Quantity and specific configuration: 1 set of 15KW Off-Grid Solar Power System Description : This Anern 15kw off-grid solar power system project was used for personal house use. Faced with the cost of a ...

The Gambia entered a new era of energy development in April 2023 with the inauguration of its first large-scale solar energy facility in Jambur. Built by Chinese manufacturer Tebian Electric Apparatus, the 23 MW solar ...

1.4 The development of solar energy in The Gambia By virtue of its geographical location, The Gambia enjoys very good solar insolation throughout the year with slight seasonal variations. The average daily solar radiation ranges from 4.46.7 - kWh/m² making solar energy the most prominent renewable energy resource of the country.
