

Where is a Starlink satellite internet system in Ukraine?

A Ukrainian serviceman stands next to a vehicle that carries a Starlink satellite internet system near the front line in Donetsk region, Ukraine, on February 27, 2023. In recent months, Russian social media channels run by crowdfunders have been increasingly open about Starlink purchases.

Will Starlink work in Ukraine?

In February, Musk responded to Ukrainian claims the Russians were using Starlink by stating that his company did not do business with the Russian government, and that the system would not work in Russia. But Starlink was unclear if the technology might work in Russian-occupied areas of Ukraine.

Why is Starlink so important to Ukraine's military?

The Starlink internet service has provided a significant frontline advantage to Ukraine's smaller military since the 2022 invasion, permitting its forces to share real-time drone feeds between units, and communicate in areas where combat has disrupted cellphone service.

Are Starlink drones sold in Russia?

Russia said Starlink was not certified in their country and accordingly could not be officially supplied in Russia and was not officially used there. Similarly to SpaceX's terminals, DJI's drones are sold in Russia without the company knowing or agreeing with the sales.

How much does Starlink internet cost in Ukraine?

The standard package of satellite Internet by Starlink costs \$110 per month. You also need to purchase equipment worth \$599. Since August 24, Ukraine has received a special price: a \$60 subscription fee and \$385 for the equipment. The preferential price will be valid until the pricing policy is revised next time.
