In 2011, Sudan lost three-quarters of its oil production when it split from South Sudan [10]. As a result, the constantly increasing energy gap is covered by importation from the international market [2]. Hence, the country's economy and energy situation are worse after South Sudan's referendum, raising questions about alternatives.

Using a basic plug and play solar system which powers a small submersible water pump, farmers can use the flexible hose system to water their crops and provide the livestock with water. The system consists of foldable 200Wp solar ...

This transformative shift towards solar power not only mitigates climate change but also enhances energy resilience. With a reliable electricity source complementing the conventional grid, the hotel can navigate power outages and fluctuations while significantly reducing their carbon footprint and electricity bills.

South Sudan is the world's least electrified country, and solar power is a great solution. The solar-powered water systems are easy for communities to maintain, rarely break down and don't require expensive fuel supply. Most importantly, they are a green technology, with minimal environmental impact.

One of the major projects accomplished in 2020 was the installation of a hybrid solar PV-diesel system at the United Nations House compound in Juba, the capital city of South Sudan [5]. As a result, the main goal of this research is to explore the possibility of using a hybrid power system to deliver electricity to a rural area in South Sudan ...

Solar Synergy South Sudan is a subsidiary of Barefoot Power, a social enterprise that aims to eradicate energy poverty by offering affordable and safe solar solutions to people at the base of the economic pyramid (BoP) in South Sudan. Solar Synergy is a social enterprise focused on distributing Firefly(TM) solar lighting systems to people at...

The 9 meter hybrid parabolic solar concentrator (solar dish) continuously tracks the sun throughout the day using a dual axis tracker enabling the system to harvest maximum solar energy from early sunrise to late sunset. Most solar ...

"We used to walk hours every day just to fetch dirty water," recalls Joyce, a 31-year-old mother living in Yei Town, southern-South Sudan. Talking about a new solar-powered dual hand pump system, an innovation introduced by Islamic Relief to help provide continuous access to clean water, even in such harsh environmental conditions, Joyce says:

a Parabolic dish solar concentrator model. b Euro dish stirling parabolic dish collector (Hafez et al. 2017 Wounded cavity receivers with cylindrical, cubical, and hemispherical shapes (Loni et al ...

The state shares international border with South Sudan in the south, and state boundaries with East Darfur, South and North Kordofan states in the western, eastern and ... solar PV systems involve the use of toxic materials, e.g. the production of poly-silicon, and therefore require diligence in following environmental and safety guidelines ...
