That's false. Solar panels work the best when it's cold and the sun is up. In summer for example solar panels need to down regulate Well yes, but actually no: we don't have that much really sunny days in winter and it's also getting dark at 17:00. There are way more factors which influence a PV panel's performance.

Can't really speak to the cost of solar panels compared to other countries. But while you are right about electricity being relatively expensive in Germany, driving an electric car for 100km is still cheaper than driving a regular petrol car for 100km, especially in stop and go traffic in the city.
