

Is there solar power in Myanmar?

Myanmar has high solar irradiation levels in many areas, but no large-scale solar power systems have been installed due to the largely mountainous terrain, protected areas, and limited grid system. Solar power is currently an option only for rural and off-grid applications in Myanmar.

Who won a solar project in Myanmar?

The remaining two bidders, including groups led by German developer ib vogt and Myanmar's Gold Energy, likewise secured projects. According to the latest statistics from the International Renewable Energy Agency, the country reached an installed PV capacity of 84 MW at the end of 2020.

Are solar cells used in Myanmar?

Myanmar, being a country with abundant sunshine, has the potential for solar energy. However, the high cost of solar energy limits its availability for some. Researchers have been conducting research on solar cells in Myanmar to address this issue.

What role does off-grid solar play in Myanmar's electrification strategy?

Off-grid solar already plays a key role in Myanmar's electrification strategy. A number of rooftop PV arrays and minigrid projects have already been developed in rural parts of the country. However, the utility-scale solar segment has also started to take off. This content is protected by copyright and may not be reused.
