To illustrate how far PVT technology has come in recent years, global research platform Task 60, Application of PVT collectors, included 30 case studies in its latest report, Existing PVT systems and solutions (see the attached document). The first chapter of the document, published in May, provides an overview of PVT deployment around the world.

The DRE system could be of any type - solar, wind (or, even better, a wind-solar hybrid), or biomass or biofuel-based. Biofuel is a low-hanging fruit. India's agriculture sector generates huge amounts of biomass every year, which can be used directly as biofuel or processed to produce other biofuels such as ethanol, bio-CNG, and biogas.
