

What is Sphelar®?

Sphelar® is a registered trademark of Sphelar Power Corporation. Official website of Sphelar Power Corporation. Based on 3-dimensional light capturing micro spherical solar cell, Sphelar®, we provide see-through BIPV (Building Integrated Photovoltaics), compact solar modules for electronic devices and original concepts of solar lighting products.

How will Puerto Rico benefit from a solar PV project?

Annually, the solar PV installations will produce approximately 460,000 MWh of energy, enough to power approximately 43,000 homes, and enhance Puerto Rico's grid reliability and energy security. The co-location of the new solar and battery resources will help maximize the project's energy production and improve grid stability.

How much solar power does Puerto Rico have?

Collectively, the project comprises 200 MW of solar PV and up to 285 MW of stand-alone BESS capacity. Annually, the solar PV installations will produce approximately 460,000 MWh of energy, enough to power approximately 43,000 homes, and enhance Puerto Rico's grid reliability and energy security.

Will Puerto Rico get a solar loan guarantee?

The loan guarantee will finance the construction of two solar PV farms equipped with battery storage and two standalone battery energy storage systems in Puerto Rico. The facilities will be located in the municipalities of Guayama (Jobos) and Salinas and will help deliver clean, reliable and affordable power throughout Puerto Rico.

How can Puerto Rico meet its energy goals?

The federal study is expected to be completed by the end of this year. Four different scenarios have been modeled to meet Puerto Rico's targets -- all include more rooftop solar combined with battery storage. First is a focus on installing distributed energy on buildings where owners could then get the financial benefits of generating electricity.

What's going on with Puerto Rico's energy plan?

The plan is to transition away from imported fossil fuels -- petroleum, natural gas and coal -- to cleaner sources such as solar and wind. Another goal is to make electricity more affordable. The island's power rates are about twice as high as average rates across the U.S. The federal study is expected to be completed by the end of this year.
