

Las baterías de ion de litio en polímero, en las que la principal diferencia con las baterías de ion de litio ordinarias es que el electrolito litio-sal no está contenido en un solvente orgánico, sino en un compuesto polimérico sólido como el óxido de polietileno o poliacrilonitrilo. Las ventajas del litio polímero sobre el litio-ion son: menores costes de fabricación, adaptabilidad a ...

The project will culminate in one of the largest battery projects in the US, capable of storing 240MWh of energy. Smaller companies can now access powerful storage solutions too.
