FIMER string inverter solutions enable the smart and cost-effective designs for industrial and small utility-scale PV power plants by maximizing energy yields even in challenging land shapes and locations. FIMER's offering for these plants includes complete plug and play inverter solutions and MV stations. The string inverter solutions can be utilized also in PV power plants of ...

Growatt offers a comprehensive lineup of intelligent PV solutions suitable for residential, commercial and utility-scale solar plants. Our range of smart string PV inverters has a capacity from 0.75kW to 253kW, providing the perfect match for your solar energy needs. 02

An inverter starting at 97 percent efficiency could be at 92.2 percent or lower depending on the brand by the time the energy finally makes it to its destination. So, yes, DC transformerless is a streamlined, future-proof architecture, but you will be making a compromise in efficiency somewhere.

FIMER turnkey solutions capitalize on our long expertise in the development and manufacturing of secondary substations and medium voltage (MV) components. FIMER solutions include complete plug-and-play housings with inverters and MV components, inverter stations for indoor inverters as well as separate MV stations to supplement the outdoor inverters and inverter stations.
