Tanzania has a solar power installed capacity of just 26 MW when its total installed power capacity is 1,605.86 MW, mostly coming from gas, hydro, and petrol. Tanzania's sunshine hours per year range between 2,800 and 3,500 with global horizontal radiation of 4-7kWh per m2 per day.

It is beneficial to remain connected to the solar panel grid and investing in a battery backup system for backup power. In case the power of your solar battery runs out, a battery backup will allow you to run electricity at any time.
